THE FUND FOR ANIMALS, INC.

CLEVELAND AMORY BLACK BEAUTY RANCH

P. O. BOX 367

Type: ROUTINE INSPECTION

Date: May-10-2011

MURCHISON, TX 75778

2.40 (b) (2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care.

Nine vials of expired tetanus antitoxin injections, one 1000 ml 5% Dextrose Solution and a bottle of acepromazine were noted in the pharmaceutical section of the food processing room. The expired drugs and dextrose solutions were pointed out to management and it was explained that the use of expired medical materials such as drugs, fluids, or sutures on regulated animals is not considered to be acceptable veterinary practice and does not constitute adequate veterinary care as required by the regulations promulgated under the Animal Welfare Act. All expired medical materials found in a licensed or registered facility are to be brought to the attention of the responsible official. The facility must either dispose of all such materials or segregate them in an appropriately labeled, physically separate location from non-expired medical materials. The Animal & Plant Health Inspection Service (APHIS) has no jurisdiction over facilities using expired medical materials for non-regulated animals or non-regulated activities.

The expired medical materials were labeled expired and physically separated from the non-expired medical materials immediately.

3.75 (c) (1)

HOUSING FACILITIES, GENERAL.

(c) Surfaces--(1) General requirements. The surfaces of housing facilities--including perches, shelves, swings, boxes, houses, dens, and other furniture-type fixtures or objects within the facility--must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or removed or replaced when worn or soiled. Furniture-type fixtures or objects must be sturdily constructed and must be strong enough to provide for the safe activity and welfare of nonhuman primates.

Inspection Report

Wood perches in several primate primary enclosures contained damaged wood. Three primary enclosures contained wooden floors with flaking paint and one outside rotten wood perch for the two gibbons needed to be repaired, replaced and must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized. These non-compliant items were pointed out and explained to management.

TO BE CORRECTED BY: 06/10/2011.

Rust in several non-contact areas that affects the integrity of the structural strength of the enclosures will need to be repaired or replaced was discussed in the exit briefing. The last routine inspection and exit briefing were conducted on 08/23/10. This routine inspection and exit briefing were conducted with management and USDA VMO, Earnest H. Johnson.
